

Dear Parent or Guardian:

Your child is exhibiting symptoms of head lice infestation. Having head lice is not a health threatening problem, but it does require that treatment be given immediately.

Please check your child's head daily for two weeks and then weekly thereafter. If nits are found, check all family members. Your child(ren) may return to school once the head lice/nits have been treated and all nits have been removed.

Please complete this form and **come to the office along with your child(ren)**. **All siblings** who attend our school must report to the school office where we will check your child(ren)'s head to confirm that there are no lice or nits present.

Unfortunately, in order to ensure that this does not spread to the rest of the school, any child with lice or nits will need to remain at home until they are free of evidence of lice.

Thank you for you co-operation.

---

### Head Lice Re-admittance Form

1. After examination it has been determined that there is no evidence of lice or   
nits (eggs) on my child, \_\_\_\_\_ .  
Child's Name(s)
